Dear Siouxland Youth Hockey Association,

I've been part of the SYHA family for five years — first as a parent cheering from the stands, then as a registered volunteer, and most recently as Team Coordinator for Squirt White. My husband coaches within the association, so hockey isn't just a Saturday morning commitment in the Reel household. It's a way of life, and I would be honored to serve on the SYHA Board of Directors.

Professionally, I'm Vice President at Gleeson Constructors & Engineers, where I lead complex projects with a focus on organization, accountability, and delivering results. I'm a licensed Professional Engineer who has built my career on the same things a strong youth hockey association depends on: clear communication, sound process, and the ability to bring people together around a shared goal.

I'm also deeply rooted in the Siouxland community, volunteering with the Ronald McDonald House, the Food Bank of Siouxland, and contributing to organizations including United Way, The Salvation Army, and 100+ Men & Women of Siouxland.

I'm passionate about supporting youth development and continuing to build our hockey community. Thank you for your time and consideration.

Sincerely,
Megan Reel
