### Beyond the Court

Shoutout to Irvin (14U) — his robotics team just won the 2026 VEX AI Robotics World Championship! 🏆🤖 VEX AI is a high-level robotics competition where high school and college students design and program fully autonomous robots — no drivers, no joysticks, just pure AI and coding. This year's game, "Push Back," brought teams from across the U.S. and around the world together to compete, and Irvin's team came out on top! Congrats to Irvin!

## PARENT'S PLAYBOOK

### What to say after a tough game

- Start with "I loved watching you play today" — no matter how it went
- Let them talk first; a simple "how are you feeling?" opens the door
- Take out the term "mistake" from your discussions and replace with "learning opportunity"
- If they tried something new out there, mention it — that takes guts

## COACH'S CLIPBOARD

What a great spring session — so proud of the growth and effort every player brought to the court! As we transition into summer, the energy is only going up from here. Our coaches are fired up and ready to keep developing not just great athletes, but great people. Let's keep the momentum going!

Keep hustling,
