

**A couple items from the feedback received that Crossbar is actively working on.**

1. A sorting and being able to freeze columns/rows when you go to enter stats in your roster is being added within the next week
2. Crossbar is working on if there is a way to get the final score & spreadsheet to “stick” when teams go to enter stats after the game has been finalized (may be a bit trickier)

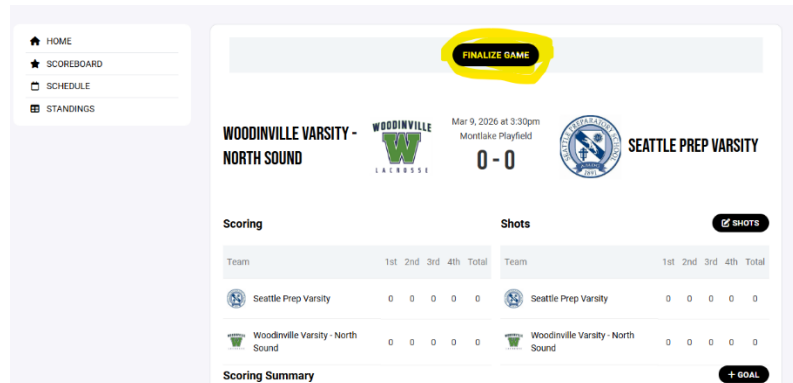

**CROSSBAR STATS FAQ SHEET**

**1. Entering the final score as the home team**

- a. Navigate to your game and select Score

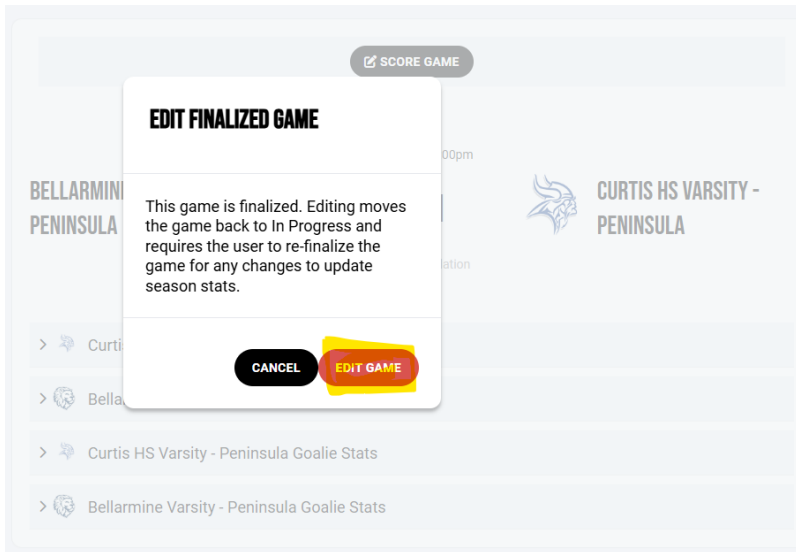

- b. Click Finalize Game at the top

- c. Add the score, attach a picture of the scoresheet\*, and hit finalize  
*\*For the time being, do not worry if the scoresheet detaches/you cannot re-upload as the away team. Crossbar is working on this*

**2. Entering stats if the game has been “finalized” aka score is entered**

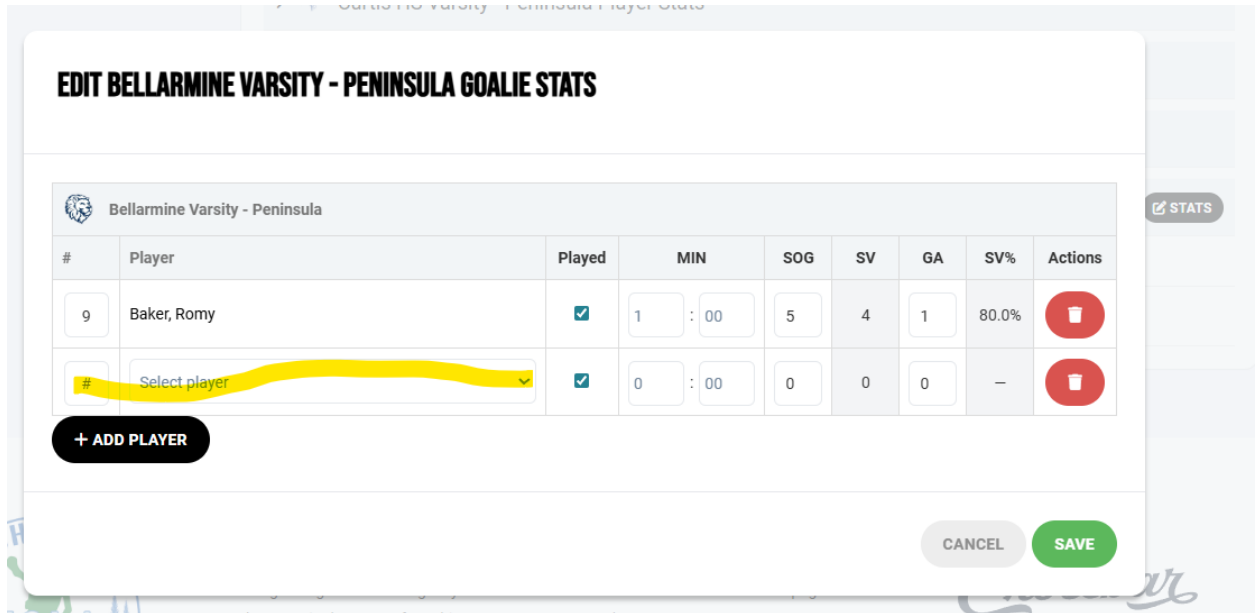

- a. Navigate to your game and select Score Game – the below box will pop up. Hit Edit Game. *(Please note this will “unfinalized” the game and you will have to re-enter the final score, regardless of home or away team)*

- b. Repeat steps from scenario 1 to finalize game. *(Again – a work in progress. Hopefully we won’t have to repeat this step)*

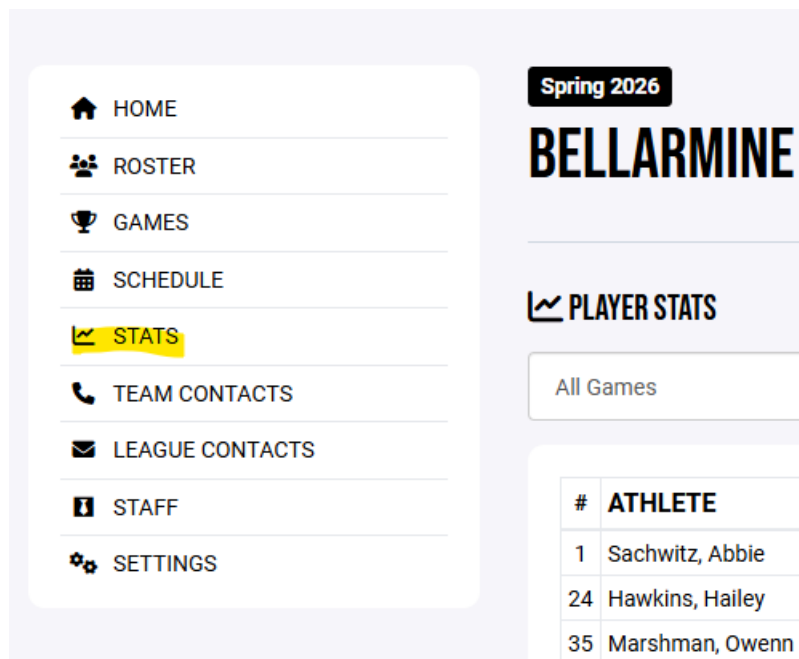

### 3. Picking your goalie for goalie stats

- a. Follow steps above to “score” game. This will allow you to edit the stats drop down for Goalies. A drop down will be available to select a player from your roster.

### 4. Stat Glossary

- a. The Stat Glossary is located on your team “stat” page found on the left hand side.

## STAT GLOSSARY

### ATHLETE

Abbr	Name	Description
GP	Games Played	Number of games played
G	Goals	Number of goals scored
A	Assists	Number of goals assisted
SH	Shots on Goal	Number of shots on goal
SH%	Shot %	Percentage of shots that score
GB	Ground Balls	Number of ground balls recovered
