Hello, my name is Robert Borne. Thank you for your consideration to continue as Treasurer for the Houston Junior Aeros Hockey Association.

I believe strongly in supporting youth development and growth through extracurricular sporting activities. My wife and I have three sons who are all involved in sports that they enjoy as well as letting them grow in a positive environment. With their involvement comes my efforts to give assistance where I think I can best serve. I have been a USA Baseball certified coach and umpire for many years and have experience working directly with kids on the field as well as team and league level administration duties in youth sports. I have assisted as Team Manager for a previous Houston Wild 10U A team and helped the coaching staff and parents with the logistical and administrative challenges of a youth travel hockey season. I have been Treasurer for the Houston Junior Aeros Hockey Association since June 2022.

I grew up in Minnesota and have been close to hockey ever since I was born. I was never the greatest skater and my playing days ended early (I went the baseball route), but I never gave up my passion for the sport. My wife and I love seeing our middle son, Aiden, as he grows in the game and loves every minute. He's been skating since he was very young during our time in Colorado and has really progressed on the ice since we moved to Houston in mid-2020 due to a work relocation.

In my professional life, I am Founder and Managing Director of Borne Consultants LLC, a boutique management consulting firm focused on turnaround, growth, and transaction advisory in the lower middle market energy and industrial firm space. Launching my career as a Field Engineer at Schlumberger Technology Corporation, I moved across technical, functional, and management roles for fourteen years before moving on to escalating leadership roles in both private equity backed and large, publicly traded, energy service companies before starting my advisory practice.

My background training includes Bachelor's degrees in Chemical Engineering and Chemistry and Master's degrees in Business Administration and Finance, as well as a MicroMasters Certificate in Accounting. I also hold Board Directorship certifications from the National Association of Corporate Directors (NACD) and the Private Directors Association (PDA).

I believe my education and professional experiences fit well with the requirements of the Treasurer role and I hope that I can be of service to the association now and continue in the future.

Thank you for your support.

Robert Borne
