

Santa Fe is the lacrosse hub in New Mexico. Since 1983 our program has provided an authentic sports development experience for our young men to be challenged, build community, and learn how this Iroquois “medicine game” transforms lives.

Two years ago, we took a step in the direction of service to our community by moving the High School Boys team to a more centrally located, more accessible, and community base focus.

But before this year is over, we need your help. Most of our families require some support for the cost of equipment, travel to games out of state, and to look respectable and fire while representing our great city.

Please be the foundation we build our home upon this season.
